To Whom It May Concern:

We have a long and successful history of associations with Richard Turlington Associates (RTA). We collaborated with them in the design of the Daniel L Malone Engineering Building at Yale University, the Miami Performing Arts Center in Miami, Florida and the Connecticut Science Center (CSC) in Hartford, CT. RTA served as Associate Architect for the latter project. The CSC was a difficult project requiring multiple bid packaging and extensive CA services. RTA enthusiastically, performed both tasks with great professionalism and skill. RTA has been a great firm with whom to associate. They are knowledgeable, efficient, reliable and great team players.

We highly recommend RTA as an Associate Architect.

Sincerely,

Mariko Masuoka, AIA, LEED AP
